Enable Internet or WAN for connected devices

In order to enable connected devices communication through the router it is needed to enable Masquerading for outgoing packets on WAN interface:

- Go to Network → Firewall→ General settings
 Select Masquerading on WAN interface and click on Save & Apply

ZONES						
Zone ⇒ Forwardings	Input	Output	Forward	Masquerading	MSS clamping	
lan: Ian: 🔔 🛬 🛛 wan	accept 🗢	accept 🖨	accept 🗢			Edit Delete
wan: wan: 』 wan6: 』 gsm: 』⇒ REJECT	reject 🗘	accept 🗘	reject 🗘	V	V	Edit Delete

A short video about this:
