WAN IP Setup

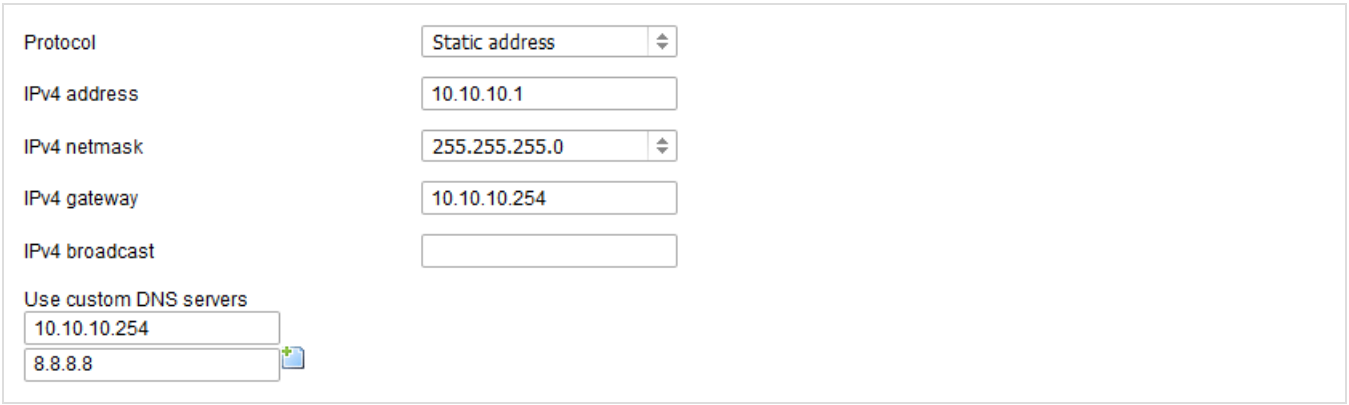
Description

One o the first steps in RTU/Datalogger setting up is to prepare connection to internet or a specific private network over Ethernet or GSM. This article describes WAN over Ethernet connection setup.

Setting WAN IP

1. Go to Network → Interfaces → Edit (WAN)
2. Select protocol - Static address and click on Switch protocol
3. Enter addresses of your WAN network and click on Save & Apply

Example:



Video how to setup WAN IP address:
