

Isolated Mode Examples

In this mode, **THE VINCI EXPERT** works as protocol master / slave. Everything that comes to A side, comes out of A side and in reverse – what comes in B side, goes to B side. A side is isolated from B side.

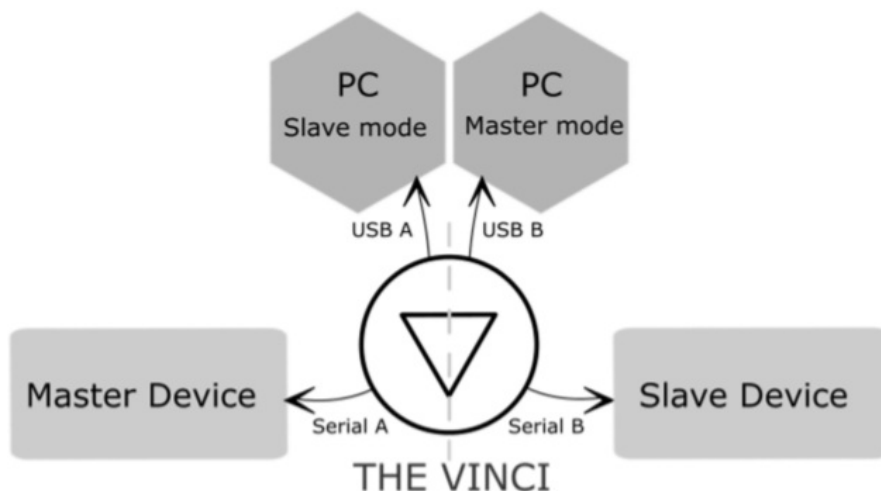

Fig.1.5.

Now, there is two instances of **THE VINCI SOFTWARE** running and two devices are connected to different sides. Each side is working independently.

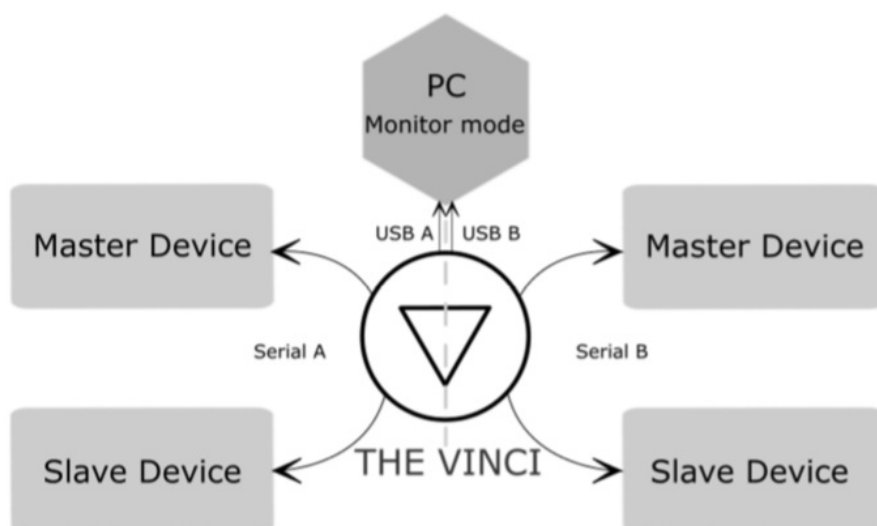

Fig.1.6.

Here **THE VINCI EXPERT** is connected to two separate pairs of devices and **THE VINCI SOFTWARE** is monitoring and analyzing data on A and B sides.
